

DESCRIPTION OF THE PRODUCTIVITY SYSTEM
(EXTRACT FROM THE REGULATIONS OF THE HUNGARIAN FOOTBALL FEDERATION)

The Hungarian Football Federation (HFF) has set up a productivity scoring system to measure the effectiveness of football sports organisations engaged in the training and development of junior players. Evaluation is based on the number of players that go on to play in professional clubs and their career success.

The measurement unit is the so called productivity point, which is the product of the time (minutes) spent on the pitch and the level (weight) of the match. The basic score in the case of men is 1 point, which is awarded after each minute spent playing in an NB I match (the highest level national championship).

The productivity points calculated after each completed match will then be divided between/among the player's junior clubs proportionate to the time they trained him.

In men's football, the points are weighted in a way to encourage the deployment of under-age and home-grown players too.

Calculation of points in men's football:

Competition series/match	Multiple used for minutes spent on the pitch (X MINUTES SPENT PLAYING)
NB III - U19 player	0.25
NB II (before the player turns 23)	0.50
NB II - U21/U20/U19 player*	0.75/1.00/1.25
NB I (before the player turns 25)	1.00
NB I - U21/U20/U19 player*	1.50/2.00/2.50
U17/U19/U21 national teams	1.00/1.50/2.00
Top foreign championships, second tier of TOP 5 championships	2.00
UEFA Europa League and Champions League	2.50
TOP 5 championships	3.00
Adult national team "A"	3.00
Extra multiplier for the deployment of home-grown players (NB I and NB II)	1.20

*The points shall be used starting out from the calendar year of point calculation (year X) for players born:

- after 1 January of year X-21 years in the case of U21.
- after 1 January of year X-20 years in the case of U20.
- after 1 January of year X-19 years in the case of U19.

Calculation of points in women's football:

Competition series/match	Multiple used for minutes spent on the pitch (X MINUTES SPENT PLAYING)
Women's NB I	0.1
Women's U-17 national team	1
Women's U-19 national team	2
Women's adult national team	3

Additional rules:

- The system takes into consideration players who turned 19 after 1 January 2007. (who were born on 1 January 1988 or later).
- The points are calculated for seasons. Each season lasts from 1 June until 31 May of the following year.
- A full productivity period consists of three consecutive seasons. The final scores are calculated and the clubs are ranked according to productivity at the end of this period (the first closed period of three seasons lasts from 1 June 2015 until 31 May 2018.)
- For point calculation purposes the training/development period lasts until the player turns 19.
- A home-grown player is a player who is deployed in matches played by the adult team of the club which trained/developed him for at least three years in a row or intermittently before his appearance in an official game.

Example:

Player: Bence Banó-Szabó (DOB: 25.07.1999.). Honvéd FC

Match: Videoton FC-Honvéd FC. 27.05.2018.

Time spent on the pitch: 74 minutes

Base point: 74 minutes x 1 weight (NB I) = 74 POINTS

Extra point for the deployment of a young player: 74 minutes x 1.5 weight (he was under 19 at the time of the match) = 111 points

Total score: 185 points

Extra point for the deployment of a home-grown player: 0.2 x 185 points = 37 points

Total score: 222 points

The player's junior clubs and the points they are awarded depending on the time they spent training/developing him:

Club	KTE	KLC	Honvéd	Total
Training/development time	3.98 years (45.26%)	1.01 years (11.43%)	3.81 years (43.31%)	8.8 years (100.00%)
Total points (185)	83.7	21.2	80.1	185.0
Extra points (home-grown)			37.0	37.0

Total score	83.7	21.2	117.1	222.0
--------------------	-------------	-------------	--------------	--------------
